# NES AI FINANCE & INSURANCE INTELLIGENCE PLATFORM

Document Register & Reading Order

**Document ID:** NES-DOC-000 | **Version:** 1.0

**Build approach:** Cline-assisted development • Local-first Windows application

**Scope:** Personal research, paper trading and insurance document assistance

Index for the NES project documentation pack

## 1. Document register

| No. | Document | When to use |
|---|---|---|
| 01 | PRD | Define goals, scope and acceptance. |
| 02 | UI/UX Specification | Design and implement page behaviour. |
| 03 | SRS | Turn needs into testable requirements. |
| 04 | Architecture Design | Define domains, layers and data flow. |
| 05 | Implementation Roadmap | Manage milestones and exit criteria. |
| 06 | Cline Instructions | Standing repository rules for AI-assisted coding. |
| 07 | API Contracts | Agree frontend/backend boundaries. |
| 08 | Data Model | Plan entities and relationships. |
| 09 | Test Strategy | Define verification and release gates. |
| 10 | Security & Privacy | Protect local documents and credentials. |
| 11 | Market Data Specification | Evaluate provider and freshness constraints. |
| 12 | Backtesting Methodology | Define reproducible historical tests. |

| No. | Document | When to use |
|---|---|---|
| 13 | Insurance Rules | Define extraction review and comparisons. |
| 14 | AI Evaluation | Grounding, uncertainty and privacy tests. |
| 15 | Error Handling | Diagnostics and safe error behaviour. |
| 16 | Backup & Retention | Recovery and deletion semantics. |
| 17 | Environment Setup | Reproducible local development. |
| 18 | User Guide | Explain prototype use and limitations. |
| 19 | Release Notes Template | Record verified changes. |
| 20 | Future Compliance Review | Gate before customer-facing regulated services. |
| 21 | ADR Template | Record major technical decisions. |

# 2. Recommended order

- Start with 01 PRD, 02 UI/UX, 04 Architecture, 05 Roadmap and 06 Cline Instructions.
- Before backend integration, complete 07 API Contracts, 08 Data Model and 09 Test Strategy.
- Before real documents, complete 10 Security & Privacy and 16 Backup & Retention.
- Before market data, complete 11 Market Data and 12 Backtesting Methodology.
- Before AI use, complete 13 Insurance Rules and 14 AI Evaluation as relevant.

# 3. Status tracking

For each document, track: Draft → Reviewed → Accepted → Updated. Record owner, version, last updated date and links to relevant code/decisions. Keep all documents in the repository under docs/.

**These documents are initial project baselines. Update them as the implementation evolves; they are not evidence that the described features are already built.**
