NES AI FINANCE & INSURANCE INTELLIGENCE PLATFORM

Release Notes & Changelog Template

Document ID: NES-REL-019 | **Version:** 1.0

Build approach: Cline-assisted development • Local-first Windows application

Scope: Personal research, paper trading and insurance document assistance

Reusable release record for verified changes

1. Release information

Field	Value
Version	0.1.0 (template)
Release date	Fill in at release
Build/commit	Fill in actual commit identifier
Status	Prototype / internal testing
Environment	Windows local development

2. Added

List features that are actually implemented and verified in this release.

3. Changed

List behaviour or configuration changes that users should know about.

4. Fixed

List verified bugs that were fixed, including issue references where available.

5. Known issues

List limitations, broken workflows, unsupported cases and temporary workarounds. Do not omit known safety or data-integrity limitations.

6. Data and migration notes

Document schema migrations, backups required, data compatibility and rollback steps.

7. Verification

- List tests run and actual outcomes.
- List platforms and screen sizes checked.
- Confirm demo/live data labelling.
- Confirm paper-trading-only boundary.
- Confirm reduced-motion and no-WebGL fallback.

Never mark a feature as complete solely because code was generated. Record only what was actually run and verified.
